Report Comments

Dear Emmanuel,

This is your Student Questionnaire on Courses and Teaching (SQCT) feedback report.

Please note that, as per the new Faculty Collective Agreement, means, standard deviations, and medians are no longer provided for student ratings in the SQCT Results Reports. [There are several resources available](#) to help with the interpretation of the ratings and student comments.

Reports that include the means, standard deviations, and medians are available to individual faculty members by request from feedback@uwo.ca

If an instructor receives a comment that they believe is offensive and wishes to report that comment, they are asked to do so using the new [SQCT Comment Review tool](#) in the Faculty/Staff Extranet. If the comment raises concerns regarding faculty or student safety, Western Special Constable Service should be notified immediately.

Historically, offensive comments, such as those that violate the Student Code of Conduct (e.g., discriminatory, harassing, threatening), have been rare at Western.

If you have any questions about the Feedback SQCT online system or the feedback results report, please contact feedback@uwo.ca.

Sincerely,

Feedback Team
Western University

Comments
It was really great opportunity to have your lecture for me. All of your classes were really interesting and nice. especially I really liked the way you teach econometrics very friendly to students.
I really enjoyed this class. I was initially not very optimistic about how it would go, but since the beginning I have felt comfortable in this class, with a positive learning environment that helps people who struggle. Emmanuel is very enthusiastic about his work, and you can tell when he teaches that he is smart and has lots of different ideas running through his head when he is teaching and explaining concepts to us. As a person he is very approachable and tries his best to explain misunderstood concepts, as well as making sure that the grading is done fairly for all students. I would recommend him as a teacher for anyone looking to take this course.
I loved your enthusiasm for the subject, it was motivating to me! I sometimes found it hard to follow what was happening in the classroom and definitely had trouble transferring what I learned in the classroom to quizzes. Maybe more practice problems and more class time focused on practice would be helpful. Overall, you were great and I had a good time in your class!
Professor is highly enthusiastic about material taught in class. He really drives students to want to enjoy what he is teaching. One of my best lectures so far at Western.
This was a great learning experience for me. One thing I will say is I would've like to do more examples in class that include numbers. But overall, I great time in this class and enjoyed learning from Professor Leclair.
Great instructor. Organized lecture material and examples given in class are quite effective in increasing understanding of concepts.
Prof leclair has been one of my favourite professors I have had at uwo. Economics has never been a favourite course of mine, yet prof leclair has made it a great experience
Great Professor who is very enthusiastic about what he teaches. The Quizzes are quite hard.
He is an enthusiastic prof and always energetic in class. It gives us a very different experience. Although this course is a little difficult, it is a special challenging under his teachin.
Make quizzes more questions
A great professor!! The only recommendation I have is go through a few "easier" numeric example and again similar questions to the quiz, they are quite difficult especially with the topics that have not gone over in class
Hey I've had fun in your class this year and learned a lot. Econometrics was a bit confusing for the first couple of classes, mainly how we would apply the concepts we learned from the previous econometrics course. But it cleared up with examples and made sense to me after a bit. It was helpful that we would revisit what we learned the previous class as well as getting us to participate in the lectures. Thanks
Sometimes goes through comments too quickly, and the whole class is lost
Great instructor, someone that greatly cares about what he teaches as well as his students.
patient
I often feel like I don't really know what is happening and that i won't really be able to use any of this outside of this course. It can sometimes we hard to see the real life applications

Section 5: Supplementary Comments on the Course

Notes: Final grades must be submitted to the Registrar prior to reviewing comments. Students are reminded that their comments about the course should be fair, constructive, useful and relevant.

Comments
The course is generally viewed as being difficult and impossible before entering, the right teaching will negate this. I learned many big picture concepts in this course and smaller understanding of how the bigger pictures interact with our daily lives
Highly encouraged the professor to continue with the way he teaches. Really makes students enjoy coming to class and always ensure we have a good laugh while more importantly insuring we are understanding the material.
Prof leclairis a great professor, he made learning a fun experience and if I have a chance to take more Econ courses with him I will
Great professor who is enthusiastic about what he teaches. The quizzes that he prepares are quite hard.
He is a responsible prof. We gained a lot of knowledge in his class. We also have many quizzes and assigns to check our weekly progress. But sometimes it would be better if the frequency of testing could be reduced.
.
No final exam is very helpful, econometrics is a very tough course in my opinion to understand so not having a final exam definitely reduces stress greatly
Emmanuel is a great instructor that brings a positive attitude to each class and presents each concept with clarity.
good
The assessments in this course are great and really fair in my opinion.

No instructor additional questions selected.
